ELECTRICAL ENGINEERING IN JAPAN

VOLUME 105

CONTENTS FOR 1985

Number 1

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Early Detection of New Microcracks on Aluminum and Aluminum Alloys Caused by a Fatigue, by Akira Suzuki and Kiyoaki Kikuchi 1
Study on V-t Curve and Space Charge Produced by Corona Prior to Flashover in Short Rod-Plane Air Gaps, by Osamu Yamamoto, Chikasa Uenosono and Muneaki Hayashi 10
A Three-Dimensional Zero-First Order Boundary Element Discretization, by Takashi Onuki and Toshiaki Yokoi 18
Reduction of Finite Element Region on Semi-Infinite Two Media Problem by Finite-Boundary Element Method, by Takashi Onuki, Ken Yoshino and Shijun Ryu 27
Very Low Frequency Response of Polyethylene Terephthalate Films, by Keiichi Miyairi . . 36
Formula of Boundary Integral for the Higher-Order Element in Boundary Element Method and Error of Solution, by Toshihiko Kuwabara and Tsuyoshi Takeda 45

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Stability Analysis of Voltage Source Inverter-Fed Hysteresis Motor, by T. Ishikawa and T. Kataoka 53
Nonlinear Eddy Current Analysis of Induction Heating by Boundary Element Method, by Kazuhisa Ishibashi 63
Characteristics of Brushless Salient Pole Self-Excited High Speed Synchronous Motor, by Sakutaro Nonaka, Kunio Fujii and Takemi 72
Measurement of Instantaneous Values of Secondary Quantities of Linear Induction Motor, by Daiki Ebihara, Kenzaburo Katagi and Hajime Yamada 82
Analysis of Electromagnetic Force Exerted on the Helical Armature Winding of Superconducting Generator, by Miyoshi Takahashi, Masatoshi Watanabe, Nariyoshi Takahashi, and Kouji Tanaka 91
Parameter Identification of Load Frequency Control System, by Ryoichi Fujiwara, Shigeru Abe, Hirosuke Doi and Hiroyuki Tanaka 99
Transient Security Enhancement of Power Systems Using Pattern Recognition, by Susumu Yamashiro, Koichi Nara and Toichiro Koike 106
Stabilizing Control of Power System by Means of Superconducting Magnetic Energy Storage, by Yasuharu Ohsawa, Hajime Miyauchi and Muneyuki Hayashi 115
Electromagnetically Levitated Vehicle on Rails Considering Rail Oscillation, by Toshiko Nakagawa and Sakae Yamamura 123

Page

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

A Method of Output Feedback Control System Synthesis and Its Application to Multivariable System, by Jiaqing Wang and Takeshi Tsuchiya 131

Number 2

PART A

Thermoelectric Properties of Deposited Semiconductor Thin Films and Their Application, by Yoshio Sakai, Shin-ichi Takeda, Yoshiharu Onuma and Mikihiko Kobayashi 1
Suppression of Local Heating on a SiC Layer by Divided Potentials (Ideal Nonlinearity Approximation, by Ken Kimura 9
Suppression of Local Heating on a SiC Layer by Divided Potentials (Numerical Analysis and Experiments), by Ken Kimura and Makoto Tsukiji 16
Electron Density Measurement by Cut-off Characteristics of Microwaves Incident upon the Thermal Plasma at 1 atm, by Yukio Kito, Yoshimi Hakamata, Hideyuki Ohno and Hiroshi Naganawa 24
Conductivity of Charged Oil Flowing in a Pipe and the Mechanism of Streaming Electrification, by Masao Arimoto, Asao Ohashi and Minoru Ueda 33
Studies on Spheromak Plasma Produced by External-Flux-Core Method (II), by Masanori Arata and Makoto Katsurai 41
Voltage Life Characteristics of Epoxy Micaceous Insulation Systems under Flexural Stress, by Hisayasu Mitsui, Katsuhiko Yoshida and Hiroshi Yoshida 49
Dielectric Breakdown of Epoxy Resin under Uniform and Nonuniform Field Conditions, by Shigetaka Fujita, Noburo Yoshimura and Fumito Noto 58
Tracking Resistance of Chlorinated Polyethylene Filled with Antimony Trioxide, by Shuhei Nakamura, Hirotoshi Kaneda, Goro Sawa, Hideo Sunazuka and Masayuki Ieda . . 67

PART B

Corroboration of Induced Lightning Voltage Suppressing Effect of Overhead Ground Wire Using Natural Lightning, by Shigeru Yokoyama, Hiroshi Mitani, Kunihiko Miyake and Nobuhara Yamazaki 75
Induction Generator Connected to a Utility Network Through DC-Link Converters, by Hidetoshi Umida, Noriaki Sato and Yoichi Hayashi 86
Induction Generator Running in Parallel to Utility Power Network Requiring No Supply of Reactive Power, by Hidetoshi Umida, Noriaki Sato and Yoichi Hayashi 95
Simulation of Steady-State Characteristics and Loss of Synchronism Phenomena in Two-Machine Infinite Bus System, by Junya Matsuki, Yoshinaga Matsumoto and Takao Okada 103
Measurement and Calculation of Zero-and Positive-Phase Sequence Impedances of Cross Bonded Single Core Aluminum Sheathed Oil-Field Cable, by Atsuhiro Katsumata and Katsutoshi Kawasaki 111
A Simplified Model of Synchronous Machine for Power System Analysis, by Mitsuaki Danjyo and Setsuo Sagara 120
A Method for Calculating the Motor Constants by Measuring Air-Gap Flux Density Distribution and for Calculating the Characteristics of Shaded Pole Motor, by Hiroo Takano 128
Asymptotic Stability Conditions for Linear Time-Delay Systems, by Takehiro Mori . . . 138

Number 3

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Tree Growth in Epoxy Resin at the Final Stage of Internal Partial Discharge Degradation, by Yoichi Kitamura and Shoji Hirabayashi 1

Page

Contamination Effect of Cathode Al, Fe, Au, on DC Breakdown in Air Gap, by Hazime Isono, Michiyuki Sugino, Mototaka Sone, and Hideo Mitsui 9
Residual Voltage due to Ionic Space Charge Polarization in Cross-Linking Polyethylene, by Futao Kaneko and Satoshi Kobayashi 18
An Analysis of Multistress Degradation of Mica-Epoxy Insulating Systems by Sequential Stress Application Method, by Yasuhiko Kako, Kenzo Kadotani, and Yutaka Higashimura 26

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Charging Current Compensation Scheme for Differential Relay in UHV Transmission System, by Chihiro Fukui, Atsumi Watanabe, Yoshihiro Sano, Yukinari Yamakoshi, Yoshifumi Okura, and Kunio Matsuzawa 36
Improvement of Output Characteristics of Thyristor Motor by Direct-Axis Compensating Winding, by Yoji Takeda, Masanobu Tsuji, and Takao Hirase 44
Three-Dimensional Analysis of Steady Eddy Current of Cryostat Outer Vessel in Superconductive Magnetically Levitated Vehicle, by Sakutaro Nonaka and Tetsuzo Sakamoto . . . 53
A New Method for Reducing Harmonics of Rectifier Circuits by Switching Taps of Interphase Reactor, by Shota Miyairi, Shoji Iida, and Kiyoshi Nakata 62
Harmonic Analysis of Synchronous Machine with AC/DC Converter, Part 1. Harmonic Voltage Characteristics of AC/DC Converter, by Takeshi Mizuma, Yasushi Sagisaka, Katsuyoshi Neri, and Yasuji Sekine 71
Analysis of Characteristics of Claw-Pole Commutatorless Motor Using Equivalent Magnetic Circuit, by Yoshiaki Tamura and Susumu Tadakuma 80
Experimental Study on the Steady-State Stability of the Two Machines Connected to an Infinite Bus System, by Junya Matsuki, Masahiro Harada, Yoshinaga Matsumoto, and Takao Okada 89
Customer Behavioral Model Under Deregulated Power System, by Tokue Ishikawa and Toshiaki Sakaguchi 96
A Brushless DC Motor of a New Structure with Reduced Torque Fluctuation, by Kazutsugu Kobayashi and Makoto Goto 104
Some Considerations on Oscillation Modes of Power Systems Including Induction Motors, by Takafumi Mayeda, Toshihiko Komukai, Yoichi Uemura, and Shigeru Satoh 113
Fast Transient Stability Solution Using Taylor Expansion and Energy Function, by Satoshi Furuya and Shinichi Iwamoto 123

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Repetitive Control for Linear Periodic Systems, by Toru Omata, Tatsuji Hara, and Mitsuo Nakano 131

Number 4

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Degradation Characteristics due to Mechanical Fatigue of Epoxy Micaceous Insulations, by Hisayasu Mitsui, Katsuhiho Yoshida, Takashi Ishizaka, and Hiroshi Yoshida 1
Pre-Breakdown Phenomena in Uniform Field Gap in SF_6, by Tatsuzo Hosokawa, Yoshihisa Sekiya, and Yasunori Miyoshi 9
Analysis of Residual Breakdown Voltage Versus Aging Time with Cyclic Bending Stress for .

Page

Windings, by Takeshi Hakamada, Yoshikiyo Kashiwamura, and Makoto Takamura 17
Flashover Mechanism on the Surface of Dielectric Plate in the Atmosphere under Negative Impulse Voltage, by Toshiyuki Shimazaki, Itaru Tsuneyasu, and Masanori Akazaki . . . 24

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

State Space Equation Model for AC/DC Transmission System, by Masahiro Takasaki, Toshiyuki Hayashi, and Yasuji Sekine 33
Subsynchronous Instability Phenomena of HVDC Transmission System, by Masahiro Takasaki, Toshiyuki Hayashi, and Yasuji Sekine 43
A Method for Calculating the Torque-Speed Curve of Parametric Induction Motor, by Yoshinori Sakamoto, Koichi Murakami, and Shinki Kikuchi 53
Area Decomposition Type Load Frequency Control under Generation Rate Constraint, by Yoshifumi Mizutani and Yasuyuki Goto 61
Fast Solution Method of Simultaneous Linear Equations for Pipeline Operation and Its Application to Power System Analysis, by Hisao Taoka and Shigeru Abe 67
Harmonic Analysis of Synchronous Machine with Converter Load, Part II, by Takeshi Mizuma, Yasushi Sagisaka, Katsuyoshi Neri, and Yasuji Sekine 77
Stability of PWM Inverter Fed Induction Motor, by Yoshihiro Murai, Isamu Hosono, and Yuzuru Tsunehiro 85
Analysis of Characteristics of Electromagnet with Shading Coil by Time Periodic Finite Element Method, by Takeshi Nakata, Yoshiro Kawase, Takashi Matsubara, and Shokichi Ito 94
Transient Analysis of Magnetic Field in Linear Actuator by Finite Element Method, by Takayoshi Nakata, Yoshihiro Kawase, and Hirofumi Takabayashi 103
Zone-Tune-Up Estimation of Apparent Impedance for Digital Distance Protection, by Jun'ichi Toyoda 109
Theory of Analysis of Transient Phenomena of AC Machines via Phase Separation Method and Decaying Vector Symmetrical Component Method, by Sakae Yamamura 117
Upwind Finite Element Solution for Saturated Traveling Magnetic Field Problems, by Motomi Odamura 126

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Optically Coupled High-Voltage pnpn Switches, by Haruo Mori, Kazuo Hagimura, and Tetsuji Imai 133

Number 5

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Nondestructive Discharge Pulses at the Inception of Treeing Breakdown in Polyethelene, by Tatsuki Okamoto and Toshikatsu Tanaka 1
DC Breakdown of Polypropylene Films in High-Temperature Region, by Masayuki Nagao, Fumitoshi Yamaguchi, Kikaku Tokumaru, Ichiro Sugiyama, Masamitsu Kosaki, and Masayuki Ieda 11
Experimental Studies on Toroidal Current Driving of Spheromak, by Makoto Katsurai, Junichi Nishimae, and Kozo Katayama 18

Page

Study on the Voltage Endurance and Prediction of the Dielectric Breakdown of High-Voltage Rotating Machine Insulations, by Tsutomu Tani, Kiyoshi Otosaki, Shinya Isoma, Sadao Matsuda, and Shoji Hirabayashi 26
Partial Discharge Characteristics and Pressure Change in a Void in Epoxy Resin, by Yoichi Kitamura and Shoji Hirabayashi 34

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Active Filters for Suppressing Harmonics Using Multiple Voltage Source Type PWM Converters, by Hirofumi Akagi, Satoshi Atoh, Akira Nabae, Yoichiro Abe, Yutaka Kuroda, and Kiyoshi Hasegawa 42
Analysis of Magnetic Frequency Tripler by Describing Function Method, by Katsuya Matsumoto, Hidetoshi Hirai, and Kosuke Harada 51
Exciterless and Brushless DC Self-Excited Three-Phase Synchronous Generator, by Fukuo Shibata and Toshio Kohrin 58
Surge Propagation Characteristics of a POF Cable, by Naoto Nagaoka, Masahiro Yamamoto, and Akihiro Ametani 67
Characteristics of Double-Sided Linear Induction Motor with Laterally Asymmetric Secondary Conductor, by Naganori Umezu, Sadao Nakazato, Shunichi Shirasaka, and Sakutaro Nonaka 76
A Method of Load Frequency-Tie Line Power Control for Area Decomposed Power System, by Koichi Kawatake, Masaharu Yamamoto, Osami Saito, and Tateki Sakakibara 86
Control of Electrical Nonuniformities Growing in MHD Generators, by Motoo Ishikawa, Tomonari Sugiyama, Keiji Kishimoto, and Juro Umoto 95
Modelling and Simulation of a Wind Power Generator, by Kazuhito Sasaki and Tomoyuki Matsusaka 102
Measurement of Magnetic Field Distribution on a Metal and Power Density in Induction Heating, by Kazuhisa Ishibashi 110
A Control Method of Induction Motor Driven by Current-Source Type Inverter Using a State Observer, by Hisao Kubota, Kouki Matsuse, and Tadashi Fukao 119

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

High-Speed Image Rotation Technique by Parallel Shifting of Coordinates, by Nuio Tsuchida, Yoji Yamada, and Minoru Ueda 128

Number 6

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Thermal Aging Effect on Morphology and Electrical Properties of Biaxially Oriented Polypropylene Films, by T. Umemura, K. Akiyama and D. Couderc 1
Thermodynamic Properties of Potassium, by Toshihisa Masuda, Hiroyuki Imai and Sadayoshi Korenaga 11
Analysis of Electromagnetic Force Exerted on the Eddy Current Sensor and the Conductor under Measurement, by Nobuo Takehira, Akio Tanaka and Takao Asada 20
An Analysis of Three-Dimensional Eddy Current Distributions by Means of Boundary Element Method, by Takayoshi Misaki, Hajime Tsuboi and Yoshio Kawakami 30

Page

Three-Dimensional Analysis of Magnetic Field with Open Space by Hybrid Finite-Element and Boundary-Element Method, by Toshiaki Yokoi, Tsutomu Kumagaya and Takashi Onuki 38
Line Harmonic Current of Three-Phase Thyristor Bridge Rectifier Circuit with DC Current Ripple and Overlapping Angle, by Masaaki Sakui, Akio Yanase and Hiroshi Fujita 48

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

A Method for Computing the Surge Impedance of Transmission Line Tower by Electromagnetic Field Theory, by Kohsi Okumura and Akira Kijima 56
VAR Allocation Using Probabilistic Load Flow, by Hiroyuki Mori and Yasuo Tamura . . 65
Parametric Resonance of Power Systems, by Naoto Yorino, Yoshiaki Nagashima, Tetsu Kubota, Hiroyuki Mori and Yasuo Tamura 74
Load Frequency Control Using Discrete Time V-Function with Power Demand Estimation by Goro Shirai 83
Brushless Three-Phase Synchronous Generator Without Exciter, by Sakutaro Nonaka and Katsumi Kesamaru 91
Analysis of the Characteristics of a Small Three Phase Induction Motor by Means of Energy Ratio, by Akira Ozawa 100
A Formulation and a Solution of Transient Stability Problem Using Energy Function, by Shinichi Iwamoto 109
A PWM Control Method of Current Source Inverter for Induction Motor Drive, by Kazunobu Ohyama, Masakatsu Daijou, Taro Yoshida and Yuzuru Tsunehiro 117

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Minimal Order Output Feedback Control System Design Method with Feedforward Control Loops and Its Application, by Jiaqing Wang and Takeshi Tsuchiya 127
Switching Power Losses of Power MOSFETs, by Mineo Katsueda and Tetsuo Iijima . . . 136
